Due to data restrictions and limitations in the database deployed for benchmark, in some countries the number of observations could be too small for the application of the benchmarking process with screening, interquartile statistics, and arm's length range. In such a situation, we will propose the appropriate turnaround and/or withdraw from the sales contract with you.

Use the Selection_ID below to specify your Benchmarking Article!

How it works?

Identify your Industry, Function, Period and your Region, and send us the chosen GTP Selection_ID!
